MUSIC COMPOSER / SOUND DESIGNER / MIXER

ABOUT ME

I am an electronic music composer, sound designer, remixer, and editor for film and television. With over two decades of experience, I have worked as a composer and sound designer for films, short films, cartoons, and commercials, as well as in video and music editing.

I play a variety of instruments, including electric, acoustic, and MIDI guitar, clarinet, charango, piano, bass and percussion. Additionally, I utilize various hardware for my music creation such as effects processors, a modular system, and several synthesizers. I consider my entire studio to be my main musical instrument.

I have also released more than 20 experimental electronic music albums under my pseudonym, OdNu.
